

# STANDARD FEATURES

**LATTICE WALL:** Standard side wall height is 7 ft. in all models. Expandable, top-quality, kiln-dried Douglas Fir is used to make the strongest product possible.

**DOOR FRAME:** Made from the finest quality BC grown, 2" x 4" Douglas Fir, sanded and stained.

**DOOR:** Weather resistant, fireproof, insulated exterior steel door; lockable door handle; height 6'4", width 2' 10".

**RAFTERS:** Lodgepole Pine logs, 85 mm, sanded and stained with metal connecting inserts, are standard in the 28' model - available for all sizes. Lodgepole rafters will never twist under snow load and are approx. 25-30% stronger than 2" x 4"s. Douglas Fir, 2" x 4"s sanded and stained, are used in other models.

**COMPRESSION RING:** Superior quality, extra thick, layered Douglas Fir, glued and bolted, sanded and stained. At the centre ring "Wind and Snow Load" straps go from rafter to centre ring on every rafter.

**DOME & OPENER:** Clear 5' diameter, opening Lexan dome (the world's strongest thermoplastic - ten times stronger than acrylic); protective safety ring around edge; all stainless steel hardware. Stainless steel opener with telescopic handle included.

Lexan is one of the world's toughest polymers with a unique combination of high impact strength and flame retardancy. No other plastic can match Lexan's combination of light transmittance and the ability to withstand extreme impact.

**TOP COVER:** Single piece top; heavy-duty 19 oz. VinaGARD® is standard on all models; UV protected; weather-resistant. Exclusive double-treated coating provides superior strength; finish enables easy cleaning; Class 1 fire retardant rating; mocha color.

**SIDE WALLS:** Single piece; 16 oz Vinagard®; Class 1 fire retardant; wind grommets built-in; wind tie-down kit included; top-coated for extra UV protection, anti-fungus and mildew protection. Colours: Burgundy, Forest Green, Mocha or Desert Sand.

**WINDOWS:** Two 50" x 40" windows; heavy duty commercial zippers on both sides and buckled at the bottom to secure closure and prevent the wind from getting behind; 20 mil. clear vinyl removable windows with extra zippers on both sides and velcro fasteners top and bottom; built-in screens.

**TENSION CABLE:** 3/16" aircraft quality stainless steel; cable exceeds engineering specifications.

**HARDWARE:** All stainless hardware included; screws, washers, brackets, rope, and cable.

**PLATFORM PLANS:** Available for all sizes.

**WARRANTY:** Fifteen years on insulation; ten years on fabric; two years on materials and workmanship.

- QUALITY BUILT IN B.C.
- ENGINEERED TO LAST
- FULLY WARRANTEED

*"Yurtco gave us first-rate customer service and we are thrilled with the quality of our yurt. We are so happy we chose the log rafters as they really add so much charm to the interior."*

*Frank, B.C.*

*"On Saturday night the Pacific Coast of Japan was hit by a massive Typhoon, the worst in 100 years, with gusts of 180 km/hr. Of course I had a sleepless night fearing the destruction of my yurt. When I arrived at the site at 7:00 am I was relieved to see it standing.*

*As one of my neighbors said on Sunday morning, if the yurt stood up to that typhoon, it will stand up to anything! They were truly amazed, and so was I for that matter! I will definitely continue to recommend Yurtco to all my friends"*

*M. Leach, Tokyo, Japan.*

*"I can't tell you enough how satisfied I am, and how much I enjoy staying in my yurt... my friends are blown away by it! It's the perfect retreat."*

*Tim, Vancouver, B.C.*
